

Description

BP

CC

MF

negative regulation of response to external stimulus
fatty acid metabolic process
regulation of inflammatory response
negative regulation of defense response
cellular response to lipopolysaccharide
cellular response to molecule of bacterial origin
cellular response to biotic stimulus
unsaturated fatty acid metabolic process
olefinic compound metabolic process
long-chain fatty acid biosynthetic process
secretory granule lumen
cytoplasmic vesicle lumen
vesicle lumen
ficolin-1-rich granule lumen
ficolin-1-rich granule
respiratory chain complex IV
cytochrome complex
specific granule lumen
lipid droplet
respiratory chain complex
protease binding
electron transfer activity
arachidonate-CoA ligase activity
cytochrome-c oxidase activity
long-chain fatty acid-CoA ligase activity
aldehyde dehydrogenase
aldehyde dehydrogenase [NAD
fatty acid ligase activity
fatty acid-CoA ligase activity
CoA-ligase activity

GeneRatio
